

A 5 Year Analysis of Caesarean Section In Subharti Chhatrapati Shivaji Medical College Hospital, Meerut

Mamta Tyagi¹, Sushma Rastogi² and Skikha Yadav³

ABSTRACT

This study was conducted to analyze women who delivered by caesarean section in Subharti Hospital to determine the section rates, indications, foetal outcome and possible ways of reducing the caesarean section rates. It was concluded that the high rate of Caesarean section was mostly due to late referral, late arrival of patients with complications to the hospital and the large number of cases with previous section.

Key Words: Caesarean section, breech deliveries, medical indications.
