

Comparison of Ordered and Unordered Estimates in PPS Sampling

Seema Raj¹ and Vinay Kumar Tyagi²

Abstract

In PPSWR, the probability of drawing any specified unit at any given draw is same but in PPSWOR it differs from draw to draw. One way of overcoming the difficulty of changing probability is to use ordered estimates. In this paper comparison has been made between some different types of estimates.

Keywords : SRS, PPSWR, PPSWOR, Efficiency, Ordered estimates, Unordered estimates.
